

## INDEX

### ABSTRACT

Assignment Name: Clinic Management System

Scope: Purpose of the system is to enable user to interact with the database, edit, update and retrieve data easily with a user-friendly interface.

### AIM

I attempted to make a clinic management system which streamline the processes such as registering, making appointment, consulting doctors schedule and enabling administrative privileges.

### OBJECTIVE

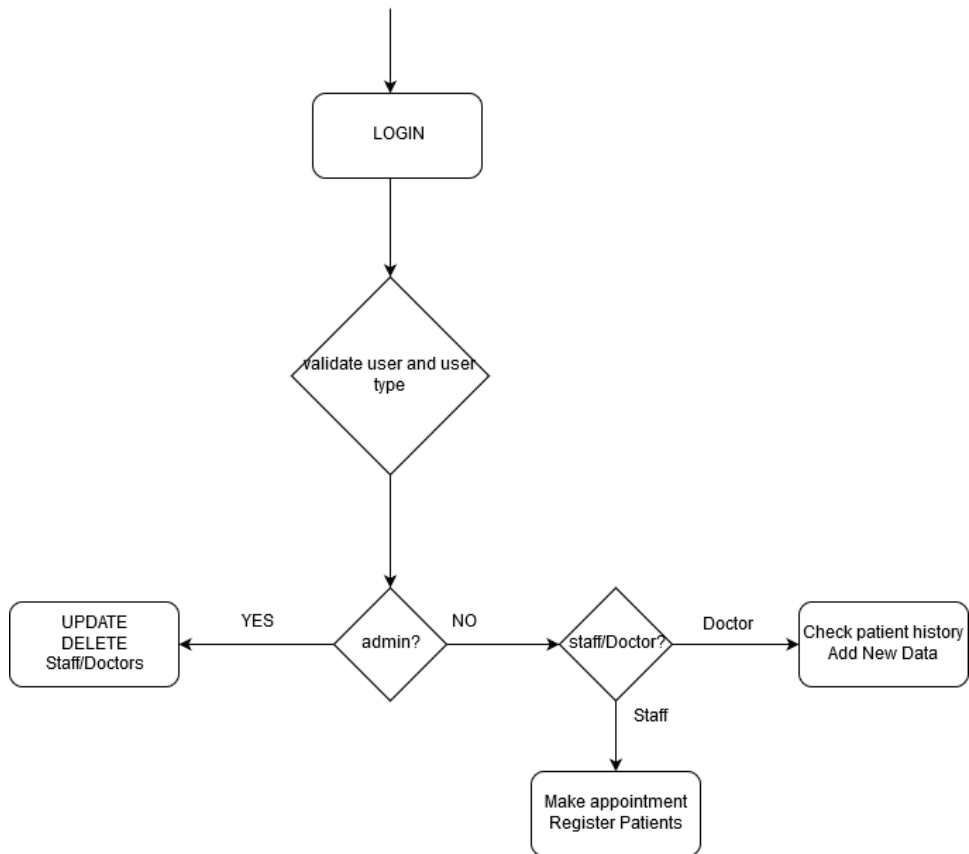

- Include a login page with different user types.
- To have an administrative panel.
- Create a free-flowing system.
- Create a user-friendly system.

### PROJECT DETAILS

#### User Specifications

1. Admin: Administrator has the privilege of controlling all the data which includes creating, updating, deleting etc.
2. Staff: Staff can create appointments and register patients and view doctors.
3. Doctors: Doctors can view patient history and consult patients and add in the relevant details of the consultations.

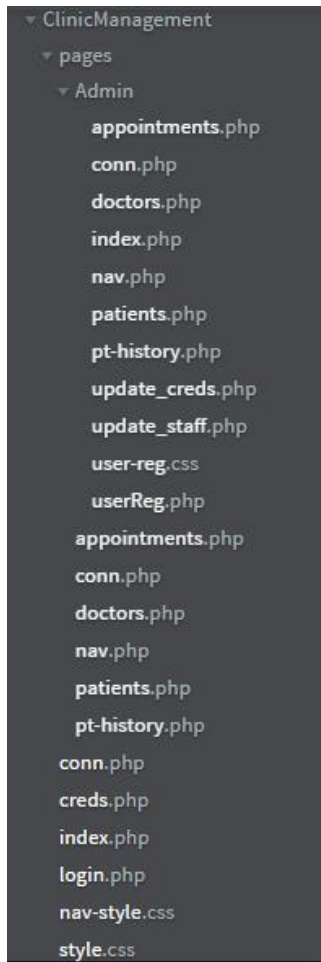

## SYSTEM FLOW-CHART

## SDLC METHOD:

Incremental method is the model chosen for this project, as after every iteration it can be tested. And can go back to change the iterations to change any part that needs to be changed.

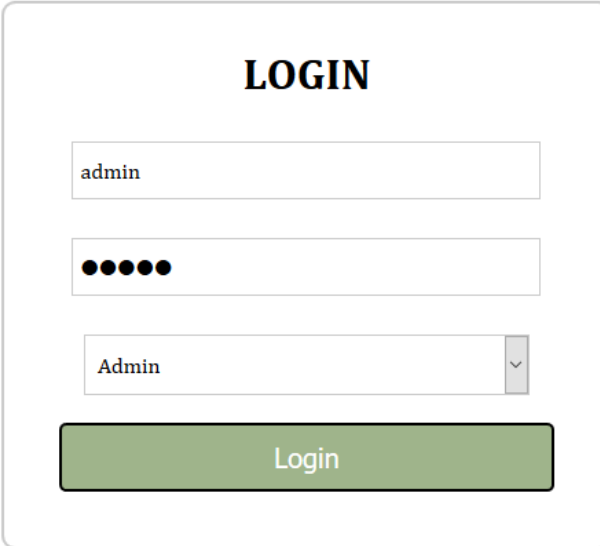

## SYSTEM TREE

- System tree is divided in to three main folders
- Main folder, Pages, and Admin folder
- Main folder consists of main style.css, login, connection file, credit file which is for login validation, navigation style.css file
- Pages folder contains appointment page, doctors page, navigation page, patient history
- Admin folder consists of the same folders above mentioned in the pages folder but with administrative privileges.

## SYSTEM SCREEN SHOTS

### Login

A screenshot of a login form titled "LOGIN" in bold black text. The form is enclosed in a light gray rounded rectangle. It contains three input fields: the first is a text field with "admin" entered; the second is a password field with five black dots; the third is a dropdown menu with "Admin" selected and a downward arrow icon. Below these fields is a green "Login" button with white text.

- Login page has three different user type logins
- Staff
- Admin
- Doctor

appointment

- The index page for all the users is the same except for the admin, which consists of an admin panel tab. For all the administrative purposes.
- Doctors Divider shows all the doctors that are in the Clinic
- Appointment divider shows all the appointments for the current day
- Appointment Id in the Appointment table is clickable, which leads to doctor's consultations tab, where doctor can see the patient's history if any, and he can add his conclusion of the current patient to the patient history table.

## CONCLUSION

- All the data entered in the forms, goes straight to the database
- Without the Admins privileges certain functions cannot be executed
- The amount of knowledge I gained from this assignment is vast.
